

ROMEO 'JUN' ESTROPIGAN

React Developer | Frontend Developer | Software Engineer

PROFILE

I am a skilled and accomplished software engineer who specializes in front-end development, with four years of experience in web development. I possess a strong combination of creativity and analytical skills. I am a collaborative team player with keen attention to detail.

WORK EXPERIENCE

Frontend Developer (May 2022 - Present)

Satellite Office | Taguig City, Philippines

- Maintain, update, and improve existing company websites.
- To expedite the deployment process for publishing content, we migrate the Gatsby pages to Next.js. This transition from Gatsby to Next.js will help reduce the time required for deployment.
- Develop data visualization components capable of handling large datasets containing millions of records.

Software Engineer (June 2021 - May 2022)

Accenture Inc. | Mandaluyong City, Philippines

- Actively participated in the collaborative creation of proof of concept projects.
- Utilized ReactJS to convert web pages into reusable components for product development.
- Assisted clients in debugging software issues, specifically related to API integrations.
- Successfully simulated and deployed the product without compromising security.
- Migrated on-premise applications to a cloud infrastructure using AWS and Terraform.

Frontend Developer (January 2021 - June 2021)

Summit Publishing Co., Inc. | Mandaluyong City, Philippines

- Collaborate closely with developers and designers to reimplement the CMS in a ReactJS codebase.
- Contribute to enhancing the software development process.
- Deploy web-based applications, monitor their performance, and ensure their maintenance.
- Integrate and test APIs.
- Provide support to QA Engineers and resolve system defects to address issues.
- Experienced in integrating background services like push notifications and web-socket.
- Develop functional components using React to meet client specifications.

Frontend Developer (May 2019 - January 2021)

transcosmos Asia Philippines | Pasig City, Philippines

- Published a private package with comprehensive documentation on component usage and control validations.
- Implemented various transactions for an online banking system, resolving issues and enhancing web functionalities and performance.
- Restructured web pages to optimize performance by minimizing unnecessary re-renders.
- Developed and optimized user-friendly websites based on component architecture.
- Translated design files (PSD) into HTML code.
- Built a stable and maintainable ReactJS codebase, collaborating closely with the client to ensure efficient and technically sound designs.
- Leveraged responsive web frameworks to deliver projects ahead of schedule.
- Conducted thorough unit testing to identify bugs and improve user interface (UI), ensuring proper documentation and reports throughout the product lifecycle.
